TRUST SCORE

**90**/<sub>100</sub>

RISK LEVEL

**LOW**

Risk is derived from official safety signals (ratings and recalls) and heuristic scoring.

*This Trust Score is calculated using available federal safety data (specifications, ratings, and model safety campaigns). For VIN-specific recall status, visit [nhtsa.gov/recalls](https://www.nhtsa.gov/recalls).*

**Value of This Report** This report analyzes more than 150 official data points from the NHTSA (U.S. Department of Transportation). LionCar processes the complete federal dataset and presents only the most relevant indicators - those that directly impact the vehicle safety, reliability, and risk level. All information is derived from official public data sources of the United States Government.
